

STONY PLAIN SUN.

VOLUME THIRTEEN

STONY PLAIN, ALBERTA, THURSDAY, JULY 27, 1933

Whole No. 671

ROYAL CAFE, STONY PLAIN.

(Phone 33)

SPECIALES THIS WEEK—

PEANUTS, 10 CENTS PER POUND.

EXTRA BIG SUNKIST ORANGES, 30c. PER DOZ.

Ice Cream always on hand—Phone in your orders and have them delivered.

FIRST-CLASS FURNISHED ROOMS TO RENT.

L. M. LARSON, Proprietor.

Elephant Brand Fertilizers GETTING RESULTS.

FARMERS—You are invited to call on your local Agent, J. H. McLaughlin, at Spruce Grove, who will show you the actual results on the McLaughlin Farm or will put you in touch with other farmers in the district who are using fertilizer.

Now Is the Time to See for Yourself

WHAT WHEAT CAN DO.

Restoration of the old car to running condition or its replacement with a recent model, is one of the things the Canadian farmer has been promising himself "If Wheat Goes to a Dollar." There seems likely to be a good deal of delayed purchasing this Autumn in both Eastern and Western Canada if crop prospects are realized, and it is certain much of the buying will be in the automobile field. Ability of a single factor like the price of wheat to take care of the farmers' needs is by no means overestimated.

It was computed at Edmonton on June 28 that cash return on No. 1 Northern at typical points in Central and Northern Alberta was two and one third times the low price on Dec. 16, 1932. The actual "net return" figures were 54c as against 22c. No wonder farmers all over Canada have been jubilant about the price improvement. Incidentally, a little optimism about possible motor car business in rural areas seems to be justified.

DRESSMAKER. J. BITTNER.

NOW ON THE SOUTH ROAD,

Between Peters' and Kuley's.

GOOD NEWS "Without money and without price"

THE KINGDOM OF HEAVEN AT HAND

Thousands of Churches are without ministers notwithstanding the great need of preaching the Gospel

There is a Master in the land—See hearing the Word of God—Adventist

free

free

The people need the truth as never before. Will you do your part? The International Bible Students Association will supply ministers of the Gospel free of charge on application. Conditions: Open the church buildings, admit all free, take no collections.

DON'T BUY IN THE DARK.

The Juvenile Ball Champs.

Our local Juvenile baseball team, the members of which were "all het up" over their anticipated trip to Cardiff on Sunday last and bringing home another baseball scalp, like they did on their trip up to Heatherdown, were somewhat disappointed when informed on Saturday that the trip had been changed to a date further along. The manager is now busily engaged in arranging a game for next Sunday. In the meantime, the Heatherdown team play here tonight (Thursday).

Prize Winners at Edm. Ex.

The following were among the prize winners at the Edmonton Exhibition, held last week:

John Staub—2nd prize for kohlrabi; 1st for potatoes grown in 1932; spring wheat, any other variety than Marquis, 2nd prize; 2nd prize for white long oats; 1st for alfalfa; 1st for timothy; 1st for 1933 growth of corn; 1st for 1933 growth of 6-rowed barley; 2nd for 1933 growth of winter rye.

Harry Staub—2nd prize for hard red spring good milling and baking quality wheat.

Mrs J. Jones, Gainford—2nd prize for cauliflower; 1st prize for yellow turnips. Mrs S. Jones, Gainford—2nd prize for onions, six grown from set.

Tomahawk Tourney, July 31.

Owing to the rainy weather on Wed. the 19th, the Tomahawk baseball tournament, billed for that day, had to be postponed. The Community club intend holding it Monday next, the 31st. Five teams have been entered in the tournament, and there is a first and a second prize for the teams which compete. Refreshments will be served on the grounds for those desiring same. The day's proceedings will be climaxed by a popular dance in the hall, in the evening.

Missionfest at Golden Spike.

Rev P. Hanneman, pastor of the Saint John Lutheran church (Canadian Synod) Golden Spike, announces that there will be held a Missionfest at this church on the afternoon of Sunday next, July the 30th. He will be assisted in the service by the Rev L. Klingbeil, pastor of the Lutheran church, Onoway.

Govt Not in Twine Business

Government control of the binder twine business is not anticipated, Premier Brownlee stated, in answer to a suggestion made by Secretary McKay of the Retail Merchants Ass'n. The latter had intimated there is a possibility of the Govt entering the field and placing distribution depots throughout the province.

Tomorrow Night's Dance.

Don't forget the Community dance at Muir Lake Hall, on the evening of Friday next, July 28th, with the Snappy Four supplying the music for the occasion.

Life Means Change.

Occasionally the writer of this column feels the urge to pass on to the readers of it some thought, or idea, or even complete article he has come across in his own reading. In surrendering to that urge this week, we pass on an article appearing in a little United States magazine which does not go into general circulation, which has no subscription list, but which is distributed free to a selected list of people in all parts of the world. That article follows:

To prepare us for life in a world that is continually changing, that is a very small part of a universe in which nothing is or ever will be static even for the space of one brief second, humanity has been taught, from the earliest dawns of reason, to strive for permanence, security, safety, ease, something which we may accept as settled. Thus we find ourselves mentally and spiritually unprepared to meet the apparently sudden, unexpected changes which follow inevitably upon some wide-spread emergency. Instead of schooling ourselves to meet emergencies in their varied and unpredictable phases, we have preferred to be lulled or to lull ourselves into a sense of false security, to surround ourselves with an atmosphere of spiritual anesthesia. Instead of taking life as a tremendous adventure—and it is this or nothing—we delude ourselves into the belief that we have made of it something restfully secure, that we have created, in some measure at least, a lasting order of things. And we commit the added absurdity of telling our children that these things are so, when our whole experience, the experience of all humanity proclaims them to be utterly false.

How different would have been our reactions to the experiences of the last three uncounted years had we been free from the traditional fear of change. And why should we fear change when it is the most certain thing that life brings? It is the very essence of life, the vital grain of growth, the impulse toward achievement, the spirit of far-sighted outlook along the road of progress. Change gives life its vitality; lends it sparkle and variety and the lure of glorious adventure; makes it worth living to those who have learned the most precious, most helpful of its secrets. Acceptance of this fact is the one royal way to spiritual freedom and in spiritual freedom lies the only assurance of surety, of permanence, of safety, of ease to be found in all the range of created things. For only when the spirit is free—from delusions and superstitions and intolerances and fears and traditions and narrow prejudices and selfishness—free to venture where it will and when it will, is it prepared to meet, with profit to itself, the ever unexpected possibilities and adventures of life. The accumulation of these spiritual profits is the one sure laying-up of treasure where neither moth nor rust can corrupt, and where thieves cannot break through and steal. It is the one treasure not subject, except in enhancement, to the vicissitudes of life.

The chief thing in living is life itself. The chief purpose of life should be to live it abundantly, joyously, zestfully; to savor each of its constantly varying phases; to get all we can out of it and to put all we can into it. We should not fear to meet any part of it. We should prepare ourselves for the realities of life, frankly admit them as realities, and reap the fullest possible advantages from them. And if we do this we shall come to the inescapable conclusion that the genuinely desirable advantages of life have little if anything to do with material things.

If we would enjoy life to the full, we must change our traditional attitude toward it. Instead of building upon the illusion of permanency, we must build upon the certainty of change—constant change both within ourselves and in all other created things; physical, mental and spiritual change. For without change life could not exist. To imagine any possible permanency in life, anything static, anything unchanging even for the smallest period of our conception of time, would be to imagine our most fearing and hopeless conception of death. And life knows no death, only change, and nothing else.

There is no thought in anything I have said here that we should not strive intelligently and courageously for some measure of stability, some temporary standard of thought and action, in our material affairs; but that in our thinking, our planning and our striving we never should for a moment lose sight of the realities of life, and that neither permanency nor absolute security is one of them. Our ideas of security, of any settled order of things, should be relative. They should be held loosely and subject to the certainty of change. In other words, we should prepare ourselves for change as for the one sure thing which life offers us. Our accumulations of things material should be secondary to our accumulations of things spiritual. The insecurity of material accumulations should make us value more highly the security of spiritual accumulations—our experiences, our memories, our generous and friendly impulses, our unselfish and tolerant motives, our whole attitude toward our fellows, our confidence in the eternal beneficence of life, our love of what is good, our desire for continuing human betterment, in short, all that our experience has taught us is most to be desired.

Let us then accept life frankly as a glorious adventure, and face it at all times cheerfully and bravely. Let us banish fear, fear of present insecurity, fear to venture because of uncertainty, above all else, fear of change. Let us be constantly prepared for change, ready to take advantage of it rather than to have it take advantage of us. Let us live our lives to the full and go forward cheerfully, bravely, confidently, and with light and hopeful hearts.

Germany has a "renovize" campaign. Drought is threatening crops in parts of Honduras.

Summer Complaint Plays Havoc With the Bowels

Few people escape an attack of summer complaint. It may be slight or it may be severe, but both the young and the old are liable to it during the summer months. You can't stop it when it seizes you; so here is a tip: Let it run for a day or two and see how weak and prostrate it will leave you.

On the first sign of an attack of any looseness of the bowels take a few doses of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will give relief.

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Botanists Are Interested

Awaiting News Regarding Discovery Of Musk Plants In B.C.

Botanists everywhere are awaiting eagerly news concerning the musk plants with the long lost odor on Texada Island, B.C.

In connection with the reported discovery by Stanley Boys on Texada Island, on the British Columbia Coast, of a musk plant carrying the distinctive odor common over twenty years ago but since unknown, Dr. Arthur W. Hill, director of the Royal Botanic Gardens, Kew, England, is keenly interested.

Dr. Hill has written to Frank Kermode, of the Provincial museum of natural history, Victoria, saying the discovery, if it can be substantiated, is of every great scientific interest. He asks that if possible seed or plants with a strong musk scent may be forwarded to him at Kew, and gives instructions for their safe packing for the journey and outlines special precautions to be taken in forwarding them.

The musk of the odor well remembered by most persons of English upbringing—it was common as a pot plant for houses in England a quarter of a century ago—is said to have been taken to England originally from British Columbia by the famous Douglas, whose name is perpetuated in our Douglas fir.

It is given as having originated on the American continent by authorities. It had commercial value and was manufactured years ago and there are commercial possibilities about its rediscovery in British Columbia apart from world-wide scientific interest.

Locally Lost Galleons

Pirate Loot Within Grasp Of An English Adventurer

Treasure buried long ago by pirates who had stolen it in raids on merchantmen is believed to be within the grasp of an expedition led by Stratford D. Jolly, an English adventurer, who, with his party, set out from Brixham more than a year ago in a converted steam trawler. At least, Jolly believes the treasure is within reach. He has returned to England for a short time, but will continue the search in another vessel the trawler having been sold.

One of their party, Frank Cooper, who gave up a post in the glove-manufacturing industry at Yeovil to join the expedition as gold diver, was able to locate at Trinidad a number of sunken Spanish galleons, which were scuttled in 1797 to avoid capture by the British Fleet, according to Jolly's story.

Finding the galleons, he said, was as easy as could be for Cooper, who used for the purpose only a gramophone spring. "That Cooper's work was successful we know," said Mr. Jolly, "because we took soundings and were able to trace the actual shape of the sunken ships. They are down in only seven fathoms of water—a depth easy for divers to work in—and, above all, they are in a very sheltered part."

Prairie Wheat Sales Higher

Show Substantial Increase Over Corresponding Period In 1932

Prairie wheat marketing showed an increase of 2,651,570 bushels over the corresponding period last year for the week ending June 23, according to Dominion Government figures released this week.

Total marketings for the crop year to date were 356,742,219 bushels as compared with 299,023,190 a year ago. For Saskatchewan the year's acreage were 180,485,507 as compared with 115,863,839.

Russia's New Fast Train

With a new idea for locomotives, S. S. Valdner, an official scientist of the Russian transport commissariat, has invented an exceedingly fast railway engine which is called an "aero-train." The prefix "aero" is a trifle misleading, because the locomotive does not fly, but the term is intended to describe the engine as of the airplane type, with propellers. It is stated that the train is stable at a speed of more than 150 miles an hour.

The production of potatoes in Canada in 1932 amounted to 39,419,000 cwt., the smallest yield recorded since 1916.

Ceylon's First Woman Lawyer

Nineteen Year Old Girl Was Brilliant Scholar In London

Among those to pass the examination for call to the English Bar is Miss Avarida Mehta, of Colombo, Ceylon.

Miss Mehta is only 19 years old, a slim Parsee girl from Ceylon, whose appearance would give the impression that her school days were hardly over yet. She was a brilliant scholar at Maria Grey Training College, London, England, and after she matriculated she read for the Bar in Lincoln's Inn.

I saw her at her home in Hampshire, where she is living with her mother—writer—an Evening News representative. She was wearing a native dress of blue and gold.

"I shall be the first woman barrister in Ceylon," she said. "There are, of course, a number of women lawyers in India, but up to now there have been none in my own country."

"I am eager to begin work at the Bar in Ceylon, but I have to wait some time yet before I can do that. I cannot be called until I am 21, and I have to eat my dinner for three more terms. I may go to India first and practice there for a time before going to Ceylon."

Miss Mehta said there was no branch of the law in which she took special interest and her practice would be a general one. Her father is a marine superintendent at Colombo, and one of the few Parsees in Ceylon. "There are only 200 there," she said, "but there are 100,000 in India."

Wanted To Look Around

Prince George Climbed 180-Foot Scaffolding Beside "Big Ben"

Prince George demonstrated remarkable nerve before a small crowd of people when he climbed up the web-like scaffolding surrounding Big Ben's tower at the House of Commons. No one looking on knew who the "big boy" was. To them it was simply a young man in a gray suit.

The prince had expressed a desire to climb up the ladders from platform to platform until he reached Big Ben, and then have "a good look round." Accompanied by two men engaged on the scaffolding work, he reached the highest point. After a few minutes he climbed over a platform leading to the gallery where the bells that chime the quarters are installed. The prince ascended by means of a long spiral staircase inside the tower.

"Climbing the ladders to such a height is not an easy job for one not accustomed to the work," an official told a reporter. "But the prince got up very quickly, and showed fine nerve. He told us that he thoroughly enjoyed the experience."

During the ascent the prince had to climb up steep ladders from which, when glancing down, he could see nothing between himself and the ground. In many places the scaffolding was suspended upon which he had to walk, supported only of a couple of planks.

Matter Being Considered

Train Ferry May Be Inaugurated Between England and Sweden

A train ferry between Sweden and Britain may be inaugurated, if present plans materialize. A minimum capital of one-half million kronor already has been subscribed, due to the confidence with which the project is regarded in Britain.

Drawings for the ferry have been made and the boat is estimated to cost \$3,500,000 kronor and have room for 54 refrigerator cars, 10 freight cars and 430 first-class passengers. The Swedish terminal will be Varberg.

It has been suggested that during the summer months the ferry make an intermediate stop at Copenhagen.

Sons Birthday Dinner

Peter the Great, three tons of hippopotamus is 30 years old and Bronx zoo officials prepared his four-course birthday dinner. The appetizer was a basketful of mangels. In lieu of soup was served a sheet of young corn stalks. Entree consisted of two loaves of brown raisin bread. And the piece de resistance was Peter's standard dinner, 100 pounds of hay.

More Aeroplane Passengers

Business Increasing On U.S. Lines and Competition Is Keen

The skyways of North America are being "double tracked."

A survey of major air lines carrying passengers to every corner of America—and one of them planning to extend its activities—recently showed that commercial aviation has increased its passenger income by one-third in recent weeks.

The reason: Renewed activity in general business and loss of what aviation men call "air anxiety" by the public.

The result: A battle for the new business comparable to that of the railroads several decades ago.

In the scramble for passengers, millions of dollars have been poured into new equipment. Soundproof cabins have been evolved by United Air Lines. American Airways has responded with ships in which passengers can sleep on comfortable berths during night trips between Chicago and the Pacific Coast.

A smaller line, Northwest Airways, has ordered a fleet of planes capable of 215 miles an hour with a cruising speed of 180 and announced a plan to compete for business between Chicago and the Pacific northwest.

At the coast, Northwest will connect with Pan American Airways, which plan to extend its present lines to Alaska across the Arctic, to Asia. At present, Northwest operates between Chicago and Montana and northward to Wenatchee, Man.

At the moment of inauguration the Chicago municipal airport announced that 6,927 passengers were carried out of Chicago on regularly scheduled trips during June, an increase of 100 per cent. from a year ago.

Many licensed pilots have obtained a license in the past few months, air line officials announced, because of additional planes placed on schedules.

Trips between Chicago and New York have been doubled by three lines. A traveller between the two cities now has a choice of more than 20 planes daily, the time of the schedules ranging upward from four and three-quarter hours eastbound to five and one-half hours westbound.

Home For Orphan Boy

Adopted By Wealthy Couple Dead Son He Resembles

The home of a wealthy silk dyer and such advantages as a college education were ready for a 13-year-old orphan boy from Omaha, Neb., in what seemed like a modern version of the old story of Cinderella and the prince.

The boy was Peter Christopoli, and inmate of Father Flanagan's Boys' Home near Omaha. A picture of the lad, an orphan since early childhood, was the medium through which he has become just like a son in the home of Mr. and Mrs. Jean Strengs, who live at Paterson, New Jersey.

It seems that Strengs saw the picture of Peter and was struck by the resemblance of his son, Henry, who was drowned in Green Pond, N.J., a little over a year ago. As a result, arrangements were made to bring Peter to the Strengs household to take the place of the dead boy.

Hardly Necessary

With the nations fighting the way they do about each other, what need is there for trains that go 110 miles an hour and airplanes that go 250 miles an hour? It must be that we are perfecting communications in order to get away from each other as fast as we can.

A fence twenty miles long without a head or turn has been completed in Kingville, Tex., on the boundaries of a ranch.

Gigantic Battle Against Bovine Tuberculosis Being Waged By The Department Of Agriculture

Over 1,000,000 tuberculin tests were conducted on cattle in Canada during the past year, it was stated by Dr. G. R. Atton, veterinary director-general of the department of agriculture. Almost 1,000,000 cattle will be retested this year, and between 10,000 and 15,000 new herds added. With Canada's cattle population approximately 9,000,000, and her milk cow population slightly over the third of the total, the battle to free Canadians herds from tuberculosis is a gigantic one.

The department is discontinuing altogether this year compensating farmers whose cattle react to the test if they are under the municipal tubercular order. However, under the other policies the compensation will be paid as heretofore.

The object of the department is not primarily to protect the health of the public by this battle against bovine tuberculosis. The protection of the health of the people is a provincial and municipal matter. It is for the provincial and municipal authorities to see that milk and milk products, free from tubercular germs, are provided to the consumers of the Dominion. These authorities are responsible that the pasteurization is effective and impure milk kept from the public.

The primary object of the agricultural department is to "reduce the economic losses in livestock because of tuberculosis."

When the fight against bovine tuberculosis first started in this country, it was in what were known as supervised herds. In this the government tested the herds but did not pay any compensation for the cattle that were weeded out. That is still in force and nearly 20,000 herds will be dealt with this summer.

Then came the municipal plan in 1914. Under it a municipality took steps to insure that all the milk sold within its borders was from tubercular-free herds. The government tested any herd from which milk was sold to the corporation making the application. Some 28 municipalities originally went into the scheme and the government tested the herds. The farmers were compensated for loss of the reactors.

For some time it has been felt that this was a very ineffective method of fighting the disease and very expensive. Accordingly some eight or nine years ago the department decided to carry on with the municipalities already in the scheme but to accept no more applications. Now, however, the entire scheme has been dropped in favor of the restricted area plan, the accredited herd plan and the supervised herds.

One of the arguments against the municipal plan was that only herds supplying a certain municipality would be tested. All around it were cattle in herds not to be tested. The owner of the tested herd was continually worried about his herd, with milkers he bought elsewhere. The result was that the herds would not stay free of the disease and the number of animals which had to be slaughtered was great with a correspondingly heavy compensation bill for the government with very little progress.

Under the restricted area plan, however, entire areas are cleared of tubercular cows and county after county has gone in for this plan with its compensations.

The accredited herd plan, an international agreement whereby herds with purebred animals for sale are tested and compensation given for animals destroyed will remain in force.

Daylight Saving In Finland

Finland is the latest starter north of the Equator so far as summer-time is concerned. The clocks did not go forward until June 20th. South of the Equator, of course, summer-time doesn't start until September or October, and carries on through our winter. In one country it's always daylight saving time: In Soviet Russia all clocks are one hour in advance permanently—summer and winter.

Winnipeg Newspaper Union

By Ruth Rogers

732

LOTS OF GRACE ABOUT THIS JUMPER DRESS WITH TRAY SHOULDERES

An interesting feature is the soft shoulder strap. Its lines areძelarizing too.

Soft crepe silks, either plain or printed, are lovely for this model. Carry out as the original, you use plain crepe silk in beige for the dress with a brown and white print for the gumppe.

Red and white crepe silk jumper with plain white gumppe is just a side.

The dress can also be worn without the gumppe.

Its simple styling makes it very suitable for cotton fabrics and tub silks in white or pastel shades for your summer wardrobe.

Style No. 732 is designed in sizes 14, 16, 18, 20 years, 36, 38, 40 and 42.

Style 38 requires 3½ yards of 39-in. material for 40-in. bust with 2½ yards of 35-in. material for bust.

Price of pattern 20 cents in stamps and coin (coin is preferred). Wrap coin carefully.

To Enforce Act

Grading and Stamping Of Beef On Compulsory Basis In Saskatchewan

Saskatchewan is putting teeth into the Federal Livestock and Livestock Products Act, which provides for the grading and stamping of beef.

By a provincial order-in-council, passed on June 6, the regulations contained in the federal order-in-council which has been in effect for the past two years, have been made compulsory.

In other words, the regulations which have been operating on a voluntary basis are now placed on a compulsory basis with the onus on enforcement upon the federal government.

Publication of the provincial order-in-council, together with the regulations, as set out by federal enactment are controlled in the current issue of the Saskatchewan Gazette.

A Resourceful Trader

Tom Harvey, veteran trader of Cumberland House, 100 miles west of The Pas, Man., has created a new record for unusual freighting sights on the Saskatchewan River. Mr. Harvey needed a dwelling near his store, and having one in The Pas, he decided to move it into the hinterland. It was loaded on two scows and towed by gasoline tug.

An Example To Europe

Norse Countries Have Preserved Peace For Over Century

For more than a century peace has reigned in the Scandinavian and Baltic countries. No war has ruffed the neighborliness of these nations for almost 120 years.

Sweden, Norway, Denmark and, further south, Holland, practiced the spirit of the Briand-Kellogg pact for more than a century before that document came into existence, a political writer on the daily *Morgontidningar* reminds his readers. There is no counterpart to this phenomenon in the rest of Europe, he says.

Two facts he regards as especially interesting are that this north-western peace atmosphere of Europe has not arisen from written treaties, but from an attitude of mind and that it has shown a tendency to stop the spread of European thunder storms to the north-west and will most likely continue to do so.

Carries Radio-Phone Set

New Idea For Reporters Is Giving Entire Satisfaction

New Idea For Reporters Is Giving Radio-Telephone Set Has Received Its Baptism of Reportorial Fire and Acquitted Itself Admirably.

The set weighs 35 pounds and is carried on the back of a reporter. It has a sending range of about four miles. It uses less than two watts power and operates on ultra-high frequency waves.

The midget set received its first real test under actual reportorial conditions, when used by George Kirksey, sports writer, during the A. A. U. track and field championship at Chicago recently. Using the set Kirksey was able to flash to his telegraph wire located at the judges' stand the results of many events even before the A. A. U. timers could cover the distance from the finish lines to the judges' stand.

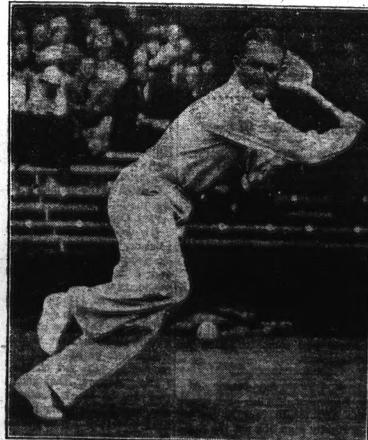

Comfort For Spectators

Winter Sport Enthusiasts In Switzerland Enjoy Heated Grandstand

Grandstands for the accommodation of winter sport enthusiasts in Switzerland are now being heated electrically. In one such stand, insulated cables are placed in rows of three under the seats. Tin strips radiate a uniform heat, and only a short time is required to heat the entire stand in this manner. In order to avoid short circuits, every cable length is grounded through an automatic switch which immediately disconnects the energized section.

The current is supplied by the same power plant which makes the artificial ice for the skating rink or other sport.

VINES CONQUEROR IN ACTION

Here is an excellent action picture of Jack Crawford who performed the iron man feat in the final of the All England Men's Singles' Lawn Tennis Championship by defeating Ellsworth Vines, United States titleholder. Crawford, who hails from Australia, has been in the front ranks of tennis stars for a number of years but this is the first time he has won the British title. The match between the Australian and United States champion went to five sets with Crawford showing much superiority in the final set.

Scientific Investigations Will Feature Work Of Government Expedition To Arctic Archipelago

Western Forage Crops

Pasture Crops Occupy Only About Five Per Cent. Of Cultivated Land

The amount of cultivated land devoted to forage crops in the three Prairie Provinces has been relatively unimportant as compared with the total area which has been seeded annually. The statistics which are available show that hay and pasture crops occupy in the neighborhood of five per cent., about half of which, or 1,000,000 acres, is improved pasture. These figures taken by themselves, however, say Dr. L. Kirk, Dominion Agrostologist, are misleading in that they do not include cereal crops which are pastured or harvested in the sheep for hay. The latter in Western Canada is very important. Oats alone are grown more extensively for feed than all other forage crops combined. No estimates are available of the uncultivated pasture lands, which are very important also and are chiefly responsible for the limited acreage of improved pasture. About 7,000,000 acres of ranching country are leased for grazing purposes.

All Metal Homes

New Process For Making Marble-Surfaced Steel

Preparing for an era of all-metal homes, the Mellon Institute announces a new marble-surfaced steel.

The stone effect is imitation, made by a laminated resin surface woven inseparably with the metal. Any other finish made with the new laminated resins can be added. In this manner, it can be made to imitate wood.

Decorative finishes already are applied to steel by other methods, the announcement states, but this is the first process to make the surfaces an integral part of the metal.

The adhesive is an alloy, such as tin and zinc, which fuses with both the steel and the covering.

Constitutes a Record

Mackintosh of Mackintosh who is 82 years of age presided at the annual dinner of the London Inverness-shire Association the other night for the fifty-second year in succession—surely a record. He is enjoying his visit to London immensely. The Mackintosh is a close friend of the King, and in proposing royal toast he always makes a brief reference to the King, the Queen, the Prince of Wales, the Princess Royal, and other members of the royal family—an unusual custom.—*Glasgow Herald*.

The Department of the Interior's 1933 expedition to the eastern islands of the Canadian Arctic Archipelago sailed from Montreal on board the Hudson's Bay Company's ship, "Nascopie," on the morning of July 8, beginning one of the most extensive patrols undertaken in many years. This year's visit to the northern posts will be extended to points in Hudson and James Bays and in addition to the regular inspection will also make a study of plant life, mineral occurrences, and parasites. It is expected that the voyage will cover about 12,000 miles and will be completed late in September or early in October.

Major D. L. McKean of the Dominion Lands Administration is again the Officer in Charge with Dr. W. C. Bethune, also of the Department of the Interior, as assistant. Mr. A. Phillip Norton is Secretary and Historian; Dr. J. A. Blidell, Department of the Interior, Ship's Doctor during the northward patrol; Dr. M. O. Malte, Department of Mines, Botanist; Mr. W. E. Middleton, Department of Marine, Meteorologist; Dr. H. C. Cumming, Department of Mines, Geologist; Dr. Ivan W. Parrott, Macdonald College, Parasitologist; Captain T. F. Smellie, Ship's Master; Dr. Blidell, the Ship's Doctor on the northward voyage, will disembark at Port Burwell, Baffin Island, and continue the work of Dr. L. D. Livingston as medical officer on Baffin Island. Dr. Blidell will remain there for two years, Dr. Livingston returning to Ottawa with the expedition.

Inspector T. V. Sandys-Wunsch is in charge of the Royal Canadian Mounted Police party with the expedition which consists of the following: Corporal W. G. Kerr and H. Kearney, and Constables S. S. Spalding and A. E. Fisher. Corporal Kearney will join the detachment at Craig Harbour, Ellesmere Island, while the others will relieve members of the force at other posts who have completed their tour of duty in the North.

Eighteen ports in all will be visited by the ship. During the voyage the supplies will be distributed to company trading centres particularly in Hudson and James Bays. The first call after leaving Montreal is made at Cartwright, on the Labrador Coast, followed by Port Burwell at the entrance to Hudson Strait, and the following points in the order named: Lake Harbour, St. P. Bay, Wolstenholme, Cape Smith, Port Harrison, Charlton Island, Churchill, Southampton Island, Dorset, Lake Harbour, Port Burwell, Dundas Harbour, Craig Harbour, Pond Inlet, Clyde River, Pangnirtung, Cartwright, and St. John's, Newfoundland. The usual call at Godhavn, Greenland, to exchange mail and with the Danish officials there will be made on the return part of the patrol possibly after the call at Clyde River, Baffin Island, Lake Harbour, Pangnirtung, and Pond Inlet are on Baffin Island; Dundas Harbour is on Devon Island, and Craig Harbour is on Ellesmere Island. They are all Government posts and among the chief objects of the expedition is to re-provision these posts and to effect changes in the personnel.

Dr. Malte, the botanist with the expedition, will make the entire voyage. Dr. Gunnin, geologist, will leave the ship at Cape Smith on the east coast of Hudson Bay and cover the area between there and Wolstenholme at the western entrance to Hudson Strait, rejoining the expedition when the boat makes its second call at the latter port. Dr. Parrott, parasitologist, will disembark at Charlton Island and carry on his studies in that area returning south by rail from Nuosonee.

First Impression

Biggins visited London for the first time, and on his return was asked by his friend Smith what struck him first about the Metropolis. "The traffic," replied Biggins, "was a cool hand on my brow, a smell of antiseptic, and a voice asking me if I felt better."

WORLD HAPPENINGS
BRIEFLY TOLD

The four-power European peace pact has been signed here by Premier Mussolini, and representatives of France, Germany and Great Britain.

Sixty Jersey cattle, including three bulls, valued at more than £10,000, left Jersey on their way to their new owners in Canada and the United States.

Drought in parts of Southwestern Africa is now in its eighth year, and many farmers have been ruined while others are trekking over the country with their cattle in search of grass.

During the four weeks ended June 30, Canadian grain exports through New York totalled 2,425,000 bushels, a decline of 2,027,000 bushels from a year ago.

With several thousand men on the waiting list desirous of entering the Royal Canadian Mounted Police, the list has been practically closed for the time being.

Edmonton is the most air-minded city in Canada, according to Col. George A. Drew, of Toronto. Addressing the Empire Club at Winnipeg, Col. Drew said Fort McMurray, north of Edmonton, was the greatest aviation centre in Canada.

There was a very definite pick-up in the exports of Canadian agricultural products to the United States in June, the value of the total being \$56,000 compared with \$217,000 in June, 1932, a report of the Dominion Bureau of Statistics said.

The "Royal Seal," crack British railway train now on show at the Chicago Exhibition, will likely visit Winnipeg this fall after the close of the Chicago Fair, according to a letter received by Mayor Ralph Webb from the Montreal representatives of the London, Midland and Scottish Co.

With an Anglo-Russian economic warfare ended as a result of negotiations between Max Litvinoff, Soviet Foreign Commissar, and Sir John Simon, Secretary for Foreign Affairs, Great Britain is looking forward to a greatly increased export trade with the Soviet Union, officials said.

Parasitological Research

McGill University To Investigate Parasitic Diseases Of Domestic Animals

Last year's report of the Empire Marketing Board referred to a decision of the board to share with the National Research Council of Canada the cost of maintaining an Institute of Helminthology (study of man and intestinal worms) at Macdonald College, McGill University, Montreal, for the investigation of parasitic diseases of domestic animals.

The laboratory buildings have been completed and equipped during the year with funds provided by the Quebec Government. Dr. T. W. M. Cameron, formerly of Edinburgh University, has been appointed director of the institute and work started on April 1, 1932. The establishment of the institute has been welcomed by agricultural and lay opinion in Canada. The administration of the work is under the control of a specially appointed associate committee on Parasitology of the National Research Council, of which Dr. H. M. Tory president of the council, is chairman.

Prince Buys Sixth 'Plane

Newest Machine Has Armchair Seats For Passengers

The Prince of Wales has purchased another aeroplane—his sixth. The new machine is a De Havilland Dragon Moth, with a maximum speed of about 130 m.p.h.

It is a biplane with six arm-chairs seats for passengers in the cabin, and separate accommodation for the pilot in the cockpit. The arm chairs are upholstered in scarlet leather and the cabin is decorated in fawn and red. The "plane is two-seated with 260 h.p. and can fly like all the prince's planes, in the red and blue of the House Brigade Flying Club.

Flight-Lieutenant F. H. Fielden, the prince's personal pilot, took the machine across the channel on a test flight. The prince intends using it himself.

By Ruth Rogers

529

FOR MATRONS OR YOUNGER WOMEN WHO FEEL THEY CAN SUPPORT SLIMMING LINES

Here's a snappy Paris model you can make at just the cost of the material.

It is a dress you can wear and wear again, you know.

It is a black and white, conservative checked soft, crinkly crepe silk.

It depends entirely on its lines for its smartness. It needs no further padding.

It has the slimming wrapped bodice and interesting curved hip seam to lengthen the silhouette. The sleeves not too full, puff just above the shoulder, which gives a certain grace to the hands.

Printed or plain crepe silks are equally smart to fashion it.

Style No. 529 is designed in sizes 16, 18, 20, 22, 24, 26, 28, 32, 34, 36, 38 and 40 inch bust. Size 36 requires 4 yards of 39-inch material.

Price of pattern 20 cents in stamp or coin (coin is preferred). Wrap coin carefully.

C.C.F. MANIFESTO DECLARIES WAR ON CAPITALISM

Regina, Sask.—What the Co-Operative Commonwealth Federation seeks for is now Division of Canada and how it aims to achieve its reforms is now before the public.

In a 4,000-word manifesto, issued on the opening of the first national convention of the organization here, the C.C.F. disclosed its program for a national planning commission to guide the nation in its transition, boards of management for control of public utilities and other social enterprises, and set forth the changes desired.

Under the new regime which the organization hopes to establish after the next federal election, when it will seek governmental power, banking and insurance would become socialized and gradually socialism would be extended to industry. First of the industries to come under public control would be transportation, communication and electric power production, to be followed by mining, pulp and paper, distribution of milk, bread, coal and gasoline. New policies for foreign trade and external affairs would be established and the system of taxation would be radically altered.

Throughout it all was sounded war on capitalism with the declaration "no C.C.F. government will rest content until it has eradicated capitalism."

"In the type of economy that we envisage," declared the manifesto, "the need for taxation, as we now understand it, will have largely disappeared. It will nevertheless be essential, during the transition period, to use the taxing powers along with other methods, as a means for providing for the socialization of industry and for extending the benefits of increased social services."

"At the present time capitalist governments in Canada raise a large proportion of their revenues from such levies as customs duties and sales taxes, the main burden of which falls upon the masses. In place of such taxes upon articles of general consumption, we propose a drastic extension of income, corporation and inheritance taxes, steeply graduated according to the wealth of the public. Tax must be given to income tax payment must be made to a tax collection system must be brought up to the English standard of efficiency."

"We also believe in the necessity for an immediate revision of the basis of Dominion and provincial sources of revenues, so as to produce a co-ordinated and equitable system of taxation throughout Canada."

The manifesto assailed the "dirt creating character" of present-day government financing. "The C.C.F. proposes," it said, "that in future no public financing shall be permitted which facilitates the perpetuation of the parasitic interest-earning class; that capital shall be provided through the medium of a national investment board and free from perpetual interest charges."

Glasgow Nurse In Rifle Shoot
Bisley Camp, Eng.—A Glasgow nurse and daughter of a famous military family, Miss Helen Rottenburgh, was one of the five women competitors as the classic King's prize service rifle match opened in the National Rifle Association empire meeting. There are nearly 1,000,000 in the King's shoot and 14 are from Canada.

Much Suffering In Russia
Hamilton, Ont.—"I never saw such suffering in my life," was the comment of Humphrey Mitchell, Labor member of parliament for East Hamilton, in writing of life in Russia under the Soviet regime. Mr. Mitchell has been visiting the U.S.S.R. and is present in Germany. His message was addressed to Mayor John Peebles.

Wage Increase
Winnipeg, Man.—A 10 per cent. increase in wages of overall makers employed by the Western Shirt and Overall Manufacturing Company was announced.

Trade With Russia

Great Britain Looking For Greatly Increased Business

London, Eng.—With an Anglo-Russian economic warfare ended as a result of negotiations between Maxim Litvinoff, Soviet Foreign Commissar, and Sir John Simon, Secretary for Foreign Affairs, Great Britain is looking forward to a greatly increased trade with the Soviet Union, officials said.

Steady progress is being made towards a new trade pact, similar to the one scrapped at the beginning of the economic troubles, which reached dramatic heights with the trial of six British electrical engineers on charges of sabotage and bribery in Moscow.

Products such as timber find a good outlet in Great Britain, and the new trade pact will facilitate such business.

The projected accord also will enable Great Britain to exert more pressure on the Soviet Union for a correction of Britain's unfavorable balance of trade.

Any increase the British will gain in the Russian markets will be mainly at the expense of Germany, where half of all the Russian purchases abroad have been placed.

Manitoba Crops

Drought and Hoppers Reduce Yield In Many Sections

Winnipeg, Man.—Varied crop prospects in Manitoba, ranging from excellent in the area north of Riding Mountain to poor in the extreme southwestern corner, are reported in the summary issued by the Manitoba department of agriculture.

Absence of adequate rain and grasshopper damage continue as outstanding factors. Rain has been insufficient for several weeks. A considerable section of the Red River Valley and a strip across southern Manitoba near the Dakota boundary are now infested with full-grown, flying "hoppers," says the report.

Rather than chance loss through drought and "hoppers," some farmers are cutting their crop for green feed.

British Empire Conference

Advances Proposal For Empire To Discuss Its Own Affairs

Melbourne, Australia—Australia joined in the experiments held elsewhere, official and unofficial, to the effect the empire should hold its own conference if the World Economic Conference proves a failure.

Addressing a gathering of ex-servicemen here Hon. H. G. Latham, Attorney-General in the Commonwealth Government, declared: "If the World Economic Conference fails I earnestly hope an attempt will be made to hold a British Empire conference at which empire affairs may be placed upon a co-ordinated and co-operative basis."

Caught In Drifting Ice

Motor Schooner Delayed a Week Reaches Churchill Safely

Churchill.—After nearly a week in the ice floes of Hudson Bay, the motor schooner "Fort Seven," Hudson's Bay Company, with Capt. D. O. Morris in command, docked here July 18. When seen upon arriving here, Hugo Conn, district manager, said there had been suffering. "The 'Fort Seven'" had been stuck in the drifting ice. When the wind was favorable the sails were raised and the ship moved slowly through the ice.

A cargo of flour from the post at York Factory was unloaded. The ship loaded supplies for northern trading posts and left for Cape Eskimo.

Prince's Herd Big Winner

Edmonton, Alta.—The Prince of Wales' herd from High River was again a big winner at the Edmonton exhibition. In the Shorthorn class Princeton Marion won the junior and grand champion, also firsts on junior get-of-size, progeny of dam and breeder's herd. Campbell Farms, of Moffat, Ont., showed the senior female champion, which was made reserve grand.

BEFORE CONFERENCE

Francis Edward Powell, chief of the International Sugar Board, who was called before the Sugar Commission at the World Economic Conference on the sugar situation.

Home and School Federation

Officers Elected At Biennial Convention In Port Arthur

Port Arthur, Ont.—Dr. G. W. Kerr, by acclamation, was elected president of the Canadian National Home and School Federation at closing sessions of the third biennial convention here. Other officers were elected as follows: Vice-President, Mrs. H. S. McLaughlin, Galt, Ont.; Provincial Vice-Presidents: Ontario, Mrs. A. K. Delaney, Vancouver, Alberta, Dr. Kerby; acting vice-president, Saskatchewan, W. J. Young; Saskatoon; Manitoba, John Halstead, Winnipeg; Maritime, and Newfoundland, Mrs. Dora Baker, Truro, N.S.

Vancouver was chosen for the 1935 convention and the British Columbia federation's campaign was adjudged a part of its poll by the organization.

Canadian Business Important

United States Pleased To Note Recovery Of Canada

New York—Commenting on the "evidence of wide-spread improvement of business in Canada," the New York Times says:

"That these gains have been made without any plan deliberately to depreciate the Canadian dollar offers further proof of the strength of natural forces now tending to promote recovery."

The Times also notes: "The evidence of Canadian improvement is of special interest to the United States, as in most American capital is invested in Canada, and Canadian markets are second in importance only to those of the United Kingdom as an outlet for American goods."

HAPPY JACK TARS ARRIVE FOR BISLEY

Our press photographer, looking around for an optimistic subject to "shoot," bumped into these naval entrants from H.M.S. Pembroke, arriving in Surrey to participate in the National Rifle Association meeting at Bisley. Judging by their faces, the long ranges at Bisley hold no terrors for them.

ASSISTANCE GIVEN MANITOBA

Says Province Should Make Own Arrangements For Financing

Winnipeg, Man.—Apart from the financial assistance rendered Saskatchewan in respect of areas in which there was a three-year crop failure, the Dominion Government has helped the province of Manitoba more than any other province, according to a statement issued by Hon. T. G. Murphy, Minister of the Interior.

The statement detailed financial aid given Manitoba and claimed in view of the assistance rendered in connection with other responsibilities, it was incumbent on the Manitoba Government to make its own arrangements for financing direct unemployment relief.

CONVERSION LOAN PLAN

Great Britain Is Seeking To Convert War Loan

London, Eng.—Great Britain, seeking to convert 5½ per cent. war loan bonds floated in the United States in 1917 into 2½ per cent. sterling bonds, asked the American holders to accept abrogation of the bonds' gold clause.

As an inducement an offer was made of conversion of each bond at 5½ per cent. \$1,000 bond into a sterling bond of £260—that is, at the rate of \$3.84 against the parity of \$4.86 which the United States dollar and pound exchange rate touched Wednesday.

The bonds were floated just before America entered the Great War in 1917.

NO STABILIZATION PLAN

No Action Yet Taken With the U.S. Dollar Or With Sterling

Ottawa, Ont.—No action is being taken with the United States dollar or with the sterling. Accordingly the Canadian dollar cannot be said to be definitely linked up with either. This was the explanation given here when the discussion over empire currencies in the British House was referred to government officials.

Leslie Horne-Beisha, financial secretary to the treasury, told the British House that no fresh proposals were under consideration for the stabilization of empire currencies.

TO SECURE GUN

Vancouver, B.C.—The gun whose booming note at 9 p.m. has set Vancouverites to watch-pulling for 39 years, will be silenced after Sunday night next. Its original purpose of supplying time for ship's chronometers having passed, the Dominion Government has decided to save its annual cost in powder of \$300. The gun was cast in 1816 and brought out to defend Esquimalt.

WHEAT GROWING NATIONS REACH AN AGREEMENT

London, Eng.—Henry Morgenthau, United States wheat negotiator, announced that the "Big Four" wheat producing nations had reached an agreement with Danubian countries providing for restriction of exports from the Danube area to 54,000,000 bushels this year and 50,000,000 next.

As regards the agreement with the Danubian states, assent was given on the part of Australian and Argentine experts for their countries, and final approval awaited the decision of the chiefs of the delegations.

There was reason to believe that an arrangement would be made with the Russian delegation fixing the Soviet export at 75,000,000 bushels.

The accord is held to be of the highest importance, since it represents the keystone of provision set up by Australian delegates to participation in an acreage restriction scheme, which is considered necessary to use up the large existing wheat surplus in order to raise prices.

Negotiations for an agreement regarding reduction of the world wheat acreage and exports have been in progress during the World Economic Conference here by spokesmen of Canada, the United States, Australia and Argentina.

The "Big Four" representatives went directly from a meeting with delegates from four Danubian countries—Hungary, Rumania, Yugoslavia and Bulgaria—to a session with Russian spokesmen.

The Russians had first been asked to limit exports this year to 40,000,000 bushels and then conceded a volume of 45,000,000 bushels.

Upon representations, however, that this year's crop in those countries is likely to be very large, they conceded a quota of 54,000,000 bushels, providing that next year's amount will be limited to 50,000,000 bushels.

Visiting Western Provinces

Trip Of Dominion Liberal Leader To Last Five Weeks

Ottawa, Ont.—On the first stage of a western trip which will occupy five weeks and probably take him to all three prairie provinces, Rt. Hon. Mackenzie King, Dominion Liberal Leader left Ottawa July 19.

The Liberal leader may visit the World Grain Exhibition at Regina. He will go to his own constituency of Prince Albert for a couple of weeks.

Mr. King may also visit the constituency of Mackenzie, Sask., where a by-election to fill the seat vacated by the appointment of Mr. N. Campbell to the tariff board is to take place.

SUNKEN CONTINENT

Submerged Continent in Pacific Twice the Width of America

San Diego, Cal.—Captain C. E. Mayo, who as captain of the naval tanker "Ramapo," plying between San Pedro and Manilla made an extensive study of the ocean bottom, said he had mapped a submerged continent in the Pacific twice the width of America. Last May Captain Mayo discovered a new deep with the sonic depth finder off the coast of Japan, where the bottom fell away to 5,501 fathoms. It was one of the greatest ocean trenches ever discovered.

PROMINENT ROTARIAN DIES

Vancouver, B.C.—James W. Davison, former Calgary business man and prominent Rotarian, died here following a lengthy illness. He was 61 years of age. Mr. Davison was a former president of the Crown Lumber Company in Calgary. He had spent two years travelling in India, the Orient, Australia and New Zealand organizing Rotary clubs.

SEEKING CHURCH CONTROL

Berlin, Germany—Rudolph H. H. Chancellor Hitler's general representative, ordered all Nazis to register for church elections, which are expected to deliver German Protestantism into hands of the Nazi Government.

Mr L M Larson, Royal Cafe
H Oppenheimer & Sons
Mr J F Clark
The Cash Store
for their donation prizes.

The Brightbank Picnic.

A lovely day and a happy throng of picnickers made the boys of Hansen's Corner and Brightbank U.F.A. Locals smile on Friday last, when they held their annual picnic on the grounds at Lucknow school. The affair was held there owing to the grounds on Henry Summerfield's farm being in poor condition.

The opening event was a ball game between Rosenthal and Hansen Corner teams. Rosenthal won; score—10 to 9.

The next event was the basketball game, Holborn Girls v Brightbank Bluebells; the game started fast and furious, with snappy plays by both the teams; Holborn was well in the lead at end of first half.

But, when the Girls had got their act together, the Bluebells started in with more determined look on their faces; and Blue Bells won; score—18 to 16. Mr P Enders refereed this game and the ball game.

Following are names of winners at the games:

Mens 100 yds. open—H Mitchell, M Barnes

14-18, 85 yards—Lyle Akins and R Fryer

10-14 yrs., 50 yards—W Propp, J Hodgin

8-10 yrs., 25 yds.—H Fryer, J Fattock

8 years and under—J Fryer, E De-walt.

Married men, 100 yds.—A Propp, F Kreye

Standing broad jump—G Carmichael, P Zahn

Running broad jump—H Mitchell, S Wright

Standing high—G Carmichael

Running high—H Dobson

Married women's sewing race, Mrs J Fryer

Girls 14-18, 50 Yds.—B Bower

Girls 10-25, 50 yds.—R Carmichael

Girls 8-10, J Burton

The play-off, Rosenthal ball team v Holborn resulted in a win for former by 18 to 14.

Mr M Washburn and W Propp interested the crowd for a short time with a few facts concerning the U. F. movement.

The dance was a record breaker—nearly 100 purchasing tickets. Owing to the school being so crowded, the dance broke up much earlier than usual.

The booth supply sold out early in the evening; there was such a demand for chewing gum that an aeroplane was despatched for a hundred pounds.

Owing to shortage of funds, the 2 Locals were unable to give very expensive prizes. They are looking for better times, and hope the crowd will remember the U.F.A. next year.

Schedule of Mails.

From the East—Sat. Tues. and Thurs. 10:37 p.m.

From the West—Mon., Thurs. & Sat. at 4:51 a.m.

The WORLD'S GRAIN EXHIBITION and CONFERENCE

Regina

July 24 to August 5, 1933

World's Largest Fire Alarm System Inaugurated

1. The new Fire Alarm Central Office Building on Mount Royal. 2. The first building of the Fire Department in Montreal in 1856, when it was kept in a volunteer station on Victoria Square. It is now in the historic collection in the Canadian War Museum. 3. A view of the interior of the building showing the back of all switchboard panels, showing the rows of electrical equipment. 4. A view of the interior of the building showing the rows of electrical equipment. 5. A view of the interior of the building showing the rows of electrical equipment. 6. One of Greater Montreal's modern Ladder Trucks, by which all calls come into the building, and are recorded on paper tape. 7. The Fire Department of the City of Montreal, which have served the City since 1899, photographed as the last line was cut over to the new Office by the installing firm of the Montreal Fire Department.

It's a far cry from the days of the volunteers hand pump and hose to the fire fighting equipment of today. The contrast is nowhere better illustrated than in this group of pictures of Montreal's new Fire Alarm Central Station, situated on the northeastern slope of

the past few years the facilities of this old board have been outgrown.

This two million dollar project has taken over two years to complete. It now holds a unique position in the fire fighting circles

world, since it is the largest Central Fire Alarm Station to be found anywhere in the world.

It is designed not alone for to-day, but very wisely provision is made for expansion, with a view to the day when the whole Island will constitute Greater Montreal.

ONLY FIRESTONE gives you all these EXTRA VALUES

T twenty-five to Forty per cent. longer tire life at no extra cost . . . that's the bonus you get for buying Firestone Tires.

Firestones do not cost one cent more than ordinary tires, but only in Firestone can you get a combination of Gum-Dipped Cords, 2 Extra Cord Plies under the tread, Balanced Construction and a scientifically designed Non-skid tread which make for extra safety and extra mileage.

Firestone Tires are guaranteed for 12 months against blowouts, cuts, bruises and all other road hazards except punctures.

Replace worn tires today. Buy Firestone . . . the strongest, safest and most economical of tires. See the nearest Firestone Dealer to-day.

Gum-Dipped Cords
with every fibre of every cord impregnated with rubber have 55% longer lasting life.

2 Extra Cord Plies
Under the tread gives 55% extra protection against blowouts, cuts and punctures. It makes your Firestone tire safe at any speed.

25% more Non-Skid
With a tread.

The Firestone tread is wider, deeper and scientifically designed for maximum traction and safety.

Occasional Wife

EDNA ROBB WEBSTER
ARTIST
LIPSTICK GIRL, ETC.

CHAPTER I.

Camilla gave her smocked shoulders a little shake of determination and hunched them over her sketch pad, focusing her eyes intently upon the still-life model which the art instructor had selected for the next progressive step of his class toward artistic appreciation and creative expression. With detailed precision, he had called their attention to the perspectives, receding contours, highlights and symmetry of the Greek art. A still-life study, he had called it.

To Camilla, the word had implied vaguely some horrible tragedy. At any rate, no two such antithetic words had any right to be hyphenated, she thought. She preferred studies in active life, anything. Virile, robust, glowingly alive, like—well, like the study of real life which interested too much with her line of vision toward the still-life study object that she was sketching with impatient difficulty.

MINARD'S
"KING OF PAIN"
LINIMENT

W. N. U. 2004

Inclined to rejoice that any circumstances of fate had placed her in the same art class with the young Nordic giant whom Professor Drake addressed as Mr. Anson, and whom she ascertained by subtle questioning among the students, was named Peter. Simple, straightforward name—Peter Anson. It suited so admirably his splendid physique and his frank, amiable manner. Camilla sighed and dropped her charcoal pencil on the drawing board with a gesture of resignation. Her sketch already resembled a man's head more than a Greek urn.

"Having difficulty, Miss Hoyt?" Professor Drake's booming voice recalled her to still-life consciousness and, what was worse, drew to her the attention of the whole class, including Peter Anson.

Camilla coloured painfully and confessed, "I—don't know—just what is the trouble. My sketch isn't going very well."

"Ahem! I see no reason for that, Miss Hoyt. You have mastered far more difficult studies. This one is very simple—she is a splendid piece of work," taking up Peter Anson's sketch as he passed on his way toward Camilla, and holding it up for the inspection of the class. "I see, the proportions are perfect—in fact, it is a replica of the original. Mr. Anson," he turned suddenly, "will you look at Miss Hoyt's sketch and see if you can find her trouble. You want experience as a critic, so tell us what should be done about it."

Peter and Camilla exchanged appealing glances that escaped the instructor's professionally keen eyes. Peter hesitated. "But I'd much rather not criticize the work of fellow students, sir—"

Camilla thought she detected an amused flicker at the corners of his mouth that leaped up and sparkled in his eyes, but his expression betrayed nothing to the waiting class.

Everyone recognized that Peter Anson was the outstanding genius of the National Art School and a favorite protege of Professor Drake. But no one resented Peter's superiority, because everyone liked Peter, whether they knew him well or not. He never was condescending or supercilious, rather the contrary; and out of class he scored any claim of superiority. His shy reticence even added to his charming manner a certain diffidence that appealed to everyone.

After a moment's sober inspection of Camilla's sketch and several corroborative glances toward the still-life study, he remarked, "I think, Miss Hoyt that you were not seeing the subject-object when you made this—there is so little resemblance. And yet it suggests something very—shall I say—real—more alive? If you will notice, the handles of the urn in your sketch look more like ears, perhaps. You must have been sketching some other object from memory, unconsciously." He turned to Professor Drake. "Sorry, sir, but I don't think I can offer a fair criticism of this, under the circumstances."

"Very well, Mr. Anson," he would suggest, Miss Hoyt, that you follow the subject object more closely, hereafter. When we have occasion to work from imagination you may do so."

"Yes, sir," agreed Camilla, collecting her materials and looking neither to the right nor left. Scorn for Professor Drake and Peter Anson burned and seethed within her breast. She felt like a troubled volcano ready to erupt with anger and humiliation that

ENO'S
'FRUIT SALT'

just when she grasped a rock of hope and was feeling its solid security, she had slipped back into the eddying chaos again. Meeting Peter Anson had done that to her. And today's experience was like a violent shove of a hand that pushed her below the surface and left her groping hopelessly.

A more prosaic person might scoff at Camilla's mental malady, and call it hyperbole and fantasy. But, of course, Camilla was not prosaic. Her aesthetic mind watched her outstanding beauty. She was dramatic and vivacious and imaginative, as she was lithe and colorful and radiant. Which describes Camilla in the abstract.

For visible features; the sparkling depths of her brown eyes first attracted her, then the childish curve of her red lips; her nose was an inconsequential thing that served to complete her facial requirements and her skin was like ivory satin that tempts the caress of your finger to see if it is soft as it looks. This picture was framed in a cloud of shining hair, black as ebony, and you could not soon forget the sweet, lingering way the black curls clung to the curve of her neck.

These are merely suggestions of the glowing beauty of Camilla. But the Greeks had a superstition that the gods were jealous of a man—or woman—who had too much good fortune, so they pulled him down. As Solon neatly put it to Croesus, "Count no man happy until he is dead, you never can tell what might happen to him."

The gods had conspired to complicate affairs for Camilla, who was almost too beautiful in their covetous eyes. But Camilla was not weeping at the Acropolis in ancient Greece. She was crying on the art school campus in twentieth century America, and held no superstitions respect for Greek gods or any others—unless it was a fair-haired youth who might have personalized a god in Norse myths, so much like a Thor or a Balder did he look. But she resolved now that even if she had the opportunity, she never would speak to him. He was as vain and concealed as he was handsome. So ran her distorted thoughts that were a mixture of resentment, humiliation, and love.

A hand touched her shoulder, then rested more heavily with gentle caress. Chills of panic quivered through Camilla's tense body.

(To Be Continued).

Made-For Choice

Garbado, Meghrigal, a Syrian, found a dandy place to stow away on the "Ile de France" when she sailed from Havre. It was a ventilator. Three days at sea, however, and Meghrigal discovered why it was called a ventilator. It ventilated. He caught cold, sneezed, and was thrown into irons.

A Hand Touched Her Shoulder

"And how," demanded Professor Drake, "do you expect to criticize the work of professionals if you do not begin on students? Perhaps," he suggested, "your criticisms would be of greater value to Miss Hoyt, even than mine would be."

Peter smiled pleasantly and stepped back to Camilla's chair. "In that case," he said, "I'll be glad to offer suggestions" and his smile was transferred to Camilla as his blue eyes met her startled black ones. Like sunshine scintillating on blue ice, she thought, reaching her sketch pad toward him at arm's length before he had a chance to come closer. She wanted to escape from the room, to hide her burning face; but her fascinated gaze was held by his face as he inspected her work.

He wanted to escape from the room, to hide her burning face; but her fascinated gaze was held by his face as he inspected her work.

HELP FOR TIRED WIVES

Take Lydia E. Pinkham's

Vegetable Compound

Wives get tired during these hard times. They are the ones who must bear the burden of house work. When their husband comes home with less money in his pay envelope . . . it is the wife who must bear the brunt of the household expenses. . . .

If you are tired . . . worn out . . . try Lydia E. Pinkham's Vegetable Compound. It will help you to regain your strength. It will give you the strength to carry on.

95 out of every 100 women who report to me say that they are benefited by this medicina. Buy a bottle from your druggist today . . . and watch the results.

Ever since she had discovered, three years ago, that life was a mad whirlpool, she had made a valiant effort to conquer it. And

the queerest quirks of fate that life could wish upon anyone. She herself never knew whether to resent it or rejoice over it. The elements for either attitudes were there. Usually, she resented it, rarely, she rejoiced over it; and in occasional optimism, methods she decided that only her destiny could determine her final attitude. On this particular day, she was

Car Leaves the Road.

While motoring past the Litzenberger farm on Sunday afternoon last, Mr Breitkreutz had the misfortune to have his car swerve and jump the grade. The machine turned a double somersault, landing "as you were." The radiator was damaged somewhat and the windshield was a total loss. Five of those aboard escaped injury, but Mrs Breitkreutz was not so fortunate, she having received cuts about the ankle, which required the attention of a surgeon.

Thanks for the Donations.

Brightbank Athletic Club wishes to express their thanks to the merchants of Stony Plain who so kindly donated the prizes to their picnic held July 12. The winners and prizes were as follows:

Box chocolates, donated by T J Hardwick; won by Miss Loyer

Ronzon lighter and jack knife, given by Stony Plain Hardware; won by H Mitchell and L Atkin

Neckyoke, by L Wudel; won by F Horn

Whip, by Zilliox & Katt; won by F H Kreye

Box of stationery, by J F Clark; won by Julia Fryer

Lady's silk hose, by L Kowensky; won by Mrs Fred Goebel

Set of bowls, by H Opertshausen & Sons; won by Mrs D Sutherland

Pair of running shoes, by Cash Store; won by Jennie Burton.

Flour Up, Liquor Down.

Local "Wata," on their return from the City, Monday brought back the news that Mr Dinning has reduced the price of his goods, in some cases so much as 50c per gallon. Australian wines have been put down 35c per gallon; Spanish wines are down 50c per gal; some Australian brandy is down by 25c per quart. On certain rye whisky and gin a cheaper price will be given customers.

As you are possibly aware, these prices are cash, as Mr Dinning, so far as we know, doesn't run his business as do the good-natured town merchants—he has no charge accounts, and rarely makes donations.

Notice of Sale of Impounded Animals

Under The Domestic Animals Act (Municipalities)

TO WHOM IT MAY CONCERN:

Notice is hereby given that by virtue of power granted under Section 44 of the Domestic Animals Act (Municipalities) and of Bylaw No. 1 of the Municipality of Inga No. 520, Dated July 25th, 1933.

1 Bay Gelding, no brand, two white rear feet and right front foot, white stripe on forehead and white stripe on nose; weight 1200 lbs; about 12 yrs old; will be sold at the Pound kept by the undersigned, on the N.E. Sec. 26, Tp. 52, Rge 1 west of Fifth Meridian, at 1 o'clock, on Friday, the 4th day of August, 1933.

Philip Litzenberger, Poundkeeper, Stony Plain, Alberta.

Brightbank News

Mr R Huston and family, of Seattle, U.S.A., are visiting friends here.

Miss Julia Fryer had the misfortune to be hit on the head by a foul ball at the picnic.

Miss Bessie Leith of Edmonton is visiting her cousin, Miss F Dickie.

Mr and Mrs Hy Schneider are spending a short holiday at Calgary.

Mr E MacIntosh of Fort William is spending a vacation with Mr Geo Dickie.

Many friends of Archie Mac Donald are glad to hear that he is making good recovery from his recent operation for appendicitis.

One local boy found the U.P.A. picnic slow, after seeing the Calgary Stampede.

Miss Betty Spady, Wainwright is renewing old acquaintances in this district.

The crops in the Bright Bank district are now the best in years, and grain raisers are only hoping that the price will be around a dollar a bushel when they come to market it.

It is stated that about 20% of the current taxes have been worked off in this district. Everyone is satisfied, as every one was equally dealt with.

It is feared that, owing to the lack of money, the Hansen's Corner school will have to be closed before the beginning of next year.

A large number of friends were entertained recently by Mr & Mrs. Jacob Schiedeman. Among those present were: Mr. and Mrs. John Armbruster and family of Stony Plain; Mrs. Spady and family; Mr. & Mrs. Donald M'Donald; Mr. & Mrs. Phil Schiedeman; Mrs. Schiedeman Sr. A royal royal reception was given and a grand meal was served.

The weed inspector has been giving this district the once over quite recently.

Quite an interest is being taken by local farmers in the new C.C.F. movement.

The Misses Ida and Jessie Lent were recent visitors at the Donald home.

The matter of obtaining the necessary binder twine for the big crop in sight is now engaging the serious attention of the local grain growers.

McLaughlin Sends Exhibits to Regina Fair.

A sample of commercially fertilized wheat crop, cut on the farm of J H McLaughlin, Spruce Grove, has been shipped to the World's Grain Exhibition and Conference, which opened at Regina, Monday, the 24th. This sample will have a place in the exhibit of the Consolidated Smelters Ltd. Along with it was sent a sheaf of green grain from a strip of unfertilized crop.

The wheat from fertilized crop stood 4 ft. high and made a heavy bundle with vigorous root system. That from the check plot stood only 3 ft. and made a thin bundle. Both were cut from 1 square yard.

Experts estimated the fertilized crop would yield 15 bu. more per acre than the other and mature 10 days earlier.

NOTICE!

WARDEN SCHOOL DIST.

NOTICE is given that the Secretary, Mrs. W. T. Propp, will be at Warden Schoolhouse on SAT. AUG. 5, for the purpose of receiving taxes.

Stony Plain and District

Rev W E Sieber, Mrs Sieber and Miss Bernice Sieber left Monday, on a motor trip to Vancouver. They were accompanied by Miss Donaldson and Miss Malloch.

Mr S C Elliot, for several years with the local bank but at present manager of the branch at Berwyn, was a Saturday visitor in Stony Plain. He was accompanied by Mrs Elliot.

Mr Singer, agent for the Empire Life Ins. Co., spent the week end with friends in Stony Plain.

Mrs Wm Pugh, a former resident of this district, is visiting here this week, with friends.

Mr and Mrs George O Low and family, of Cardston, Alta., visited with Mr and Mrs A E Michael at Soba, over the week end.

Signals for Pedestrians, Too.

Refusal of pedestrians to govern their outer section movements in accordance with the signal lights makes the problem of the motorist quite complicated. The Royal Auto Club of Montreal "suggest that these signals should have the same force for all road users, and that failure to observe them should be treated as an offense, no matter whether the offender is a motor driver or pedestrian." In the city of Toronto the police have been quite successful in friendly regulation of pedestrian traffic in accordance with the traffic signal lights. Year after year Toronto is among the big cities with a low number of traffic fatalities per 100,000 population, and this, is due in part to the operation the police have obtained from both motorists and pedestrians.

A Jumbo Spark Plug.

A spark plug big enough for an automobile two blocks long has been made by the AC Company, and is now on view at Chicago's World's Fair. The plug, which is an exact replica of an ordinary size plug, is about 5" in diameter and 12" long.
